## CiviCRM at La Patente

## a case study

Thomas Guignard, volunteer | tom@timtom.ca

CiviCamp Montréal 2024

## La Patente : makerspace coop in Quebec City

Founded in 2014
350 active members +1500 passive
Shared spaces and workshops:

- Wood- and metalworking
- Fablab \& computer lab
- Textile lab
- Community garden
- Second-hand hardware store
- Tool library...

Activities:

- Classes
- Social gatherings
- Microbrewery...

## Volunteer-run, cooperative and sociocratic

- Small team of employees help with operations, accounting, scheduling classes \& second-hand store
- Funding through membership fees, workshop rentals, grants, contracts, classes
- Heavy reliance on a core group of volunteers ("membres engagés")

## Ad-hoc IT infrastructure

- Tools chosen based on immediate needs
- Mix of hosted and cloud services
- Support for open source vs convenience
- Sysadmins are volunteers, high-turnover
- Cloud accounts often linked to individuals
- Little integration between systems
- CiviCRM member file
- Square customers file
- MyTurn users file
- GSuite users and mailing lists...

CIVICRM
Custom scripts

## $\square$ Square

(e) Discord

LA PATENTE

## CiviCRM usage

- Wordpress install on Ubuntu linux
- Maintained by volunteers
- Main members file
- Relies on manual updating
- Separate payment processing

LA PATENTE

## Challenges

- Volunteer time is limited
- Turnover, lack of documentation
- Little integration
- Duplicate effort
- Human errors
- User frustration

## Opportunities

- Leverage CiviCRM as source of truth
- Develop integrations
- Payments integration (Square)
- Sync members file (Square + MyTurn)
- Workshop usage tracking (Google sheets + civi API?)
- Custom Civi modules (?)
- Tool/item lending
- Time clock / usage log
- Fix email integration
- Membership reminders
- Newsletters

## Thank you!

Come say hi if you're in Quebec City!
